REACH, Your questionnaire to Adapt Elektronik GmbH -Status Report-

Dear Madam or Sir,

our company advises Adapt Elektronik GmbH in terms and demands of REACH. Therefore close communication to all suppliers of our customer is necessary. As expected it took some time to collect judicious answers.

As a result of enquiries of suppliers of Adapt Elektronik GmbH concerning pre-registration of substances under REACH, we can stress that Adapt Elektronik GmbH does not need to pre-register any substances, because demands of pre-registration will be fulfilled by suppliers or even their suppliers. Actually, it can be stated that in accordance with present knowledge, all present offered products by Adapt Elektronik GmbH will be further on available.

In terms of necessary information according to article 33 REACH-Directive we can observe, that all meantime achieved answers do not indicate any notification of substances listed in annex XIV. The so called candidate-list is expected to be filled dynamically so we can only ensure that all present listed 15 substances are not within the delivered products.

The enlargement of the conditions of purchase by Adapt Elektronik GmbH addressed to their suppliers may ensure, that future expansions of the candidate-list are noticed by all suppliers so that we can inform all customers of Adapt Elektronik GmbH immediately about information of new added substances in annex XIV which are to be notified within the whole supply chain.

For further enquiries do not hesitate to contact Adapt Elektronik GmbH or directly us.

Kind regards,

Alexander Reinisch
(CEO, legal affairs)
